

## 101 AND OUT...

Task: Challenge a family member to a game of 101 and Out!  
Play 3 Rounds (or more) to see who wins!

This paper and pencil game works well in second to fifth grade classrooms and can be played by teams of students (like boys against girls) or in pairs. To play you will need a sheet of paper, a pencil, and one dice. The object of the game is to score as close to 101 without going over or "out."

To play, students take turns rolling the dice. As they roll, they can either take the number as a one or a ten. For example, if a student rolls a 5, they could take it as a 5 or a 50. Students keep a running record of their total as they play.

This game works best in longer stretches, so multiple rounds can be played. I usually like to use it at the beginning of the year as a class game before math centers. It then becomes an easy and fun game for the kiddos to play during math centers
