

THE AMAZING RACE NUMBER OF THE DAY

For this task, you will show all that you know about numbers.

1. Pick a number and write it in the number of the day box. (You can draw your own template page if you don't have access to a printer.)
2. Using the circles, show all the different ways that you could represent your number. You can use base ten or any combination of operations to create your number.
3. Your race is completed when you fill in all the circles with DIFFERENT representations of the numbers.

See the example below.
